

Figures are trend-indicator values expressed in US \$m. at constant (1990) prices.

Note: The SIPRI data on arms transfers refer to actual deliveries of major conventional weapons. To permit comparison between the data on such deliveries of different weapons and identification of general trends, SIPRI uses a trend-indicator value. The SIPRI values are therefore only an indicator of the volume of international arms transfers and not of the actual financial values of such transfers. Thus they are not comparable to economic statistics such as gross domestic product or export/import figures.

Figures may not add up because of rounding.

For a description of the method used in calculating the trend-indicator value see sources and methods.
